SUMMARY

Self-taught Full Stack Developer with a strong foundation in Python, Django, JavaScript, React, and modern web technologies.
Passionate about crafting scalable web applications and solving real-world problems through code.

Projects

VaxCare - Vaccination Program Website
Django | React | JWT | Payment Integration

- Developed secure authentication (JWT-based login/logout for patients and admin).
- Integrated a payment system for online appointment booking.
- Full stack architecture with React frontend and Django REST backend.

Event Management System
Django | HTML Templates | Tailwind CSS

- Implemented user registration, event creation, and booking features.
- User Authentication: Secure user registration, login, and logout.
- Used Django's MVT(Model View Template) pattern with responsive UI using Tailwind CSS.

BookVault - Console-Based Book Management
Python OOP

- CRUD operations via terminal for books using Object-Oriented Programming.
- Menu-driven console interface for easy interaction.
